HOW DO I PROTECT MY CHILD'S PERSONAL DATA AND PRIVACY?

Our digitalized lives have led our children to meet with devices such as mobile phones, computers, tablets, the internet and social media at a very early age and become active users. Today, children have online identities with their personal data shared by their parents from the moment they are born and by themselves as users of technology from a young age, and they go beyond the usual perception of privacy.

Sometimes, even showing a photo in our family album to guests disturbs our children, who have reached a certain level of consciousness, but it will be extremely useful to inform ourselves and then our children about how detectable and vulnerable the footprints they leave in the online world will make, and to take some simple precautions.

- **READ THE INFORMING TEXTS OF PRODUCTS AND SERVICES THAT PROCESS PERSONAL DATA FOR YOUR CHILD.**

Before starting to use products and services that process personal data, check whether there are informing texts (information text, privacy policy, user terms, cookie policies, etc.) and do not forget to read them carefully.

- **CHECK YOUR INTERNET BROWSER SETTINGS!**

Be sure to check your browser's »privacy settings« and change the default settings.

- **BE AWARE OF THE PERMISSIONS YOU GIVE TO THE APPS YOU DOWNLOAD!**

When you install a new application, be aware of what permissions you have granted the application and what information the application can access on your device (smartphone, tablet, etc.). (For example, does a flashlight app really need access to your contacts? It's wise not to trust an app that asks you for information it obviously won't need).

- **BE VERY CAREFUL WHEN SHARING YOUR CHILD'S PERSONAL DATA**

Do not publicly share your children's personal data and especially their photos online.

- **USE STRONG PASSWORDS**

Use strong passwords and teach your children how to create strong passwords.
